

SHIVAM GUPTA

AI & AUTOMATION ENGINEER · LLM WORKFLOWS · SYSTEMS INTEGRATION

Shivamji00000@gmail.com · +91 99565 01139 · shivamg.in · Delhi NCR, India · [LinkedIn](#) · [GitHub](#)

AI & Automation Engineer with 2+ years building production automation and the internal software it runs on. Designed and deployed 49 n8n workflows — 8 running live in production — spanning LMS student lifecycle, fee collection, certification and sales-performance alerting, alongside full-stack platforms in Next.js, NestJS and TypeScript. Comfortable across LLM and RAG pipelines, REST and CRM integrations, Postgres schema design, and the Linux hosting infrastructure underneath. Promoted from IT Executive after automation moved from side projects into core operations.

WORK EXPERIENCE

SkillCircle | Delhi NCR, India

Jan 2026 – Present

AI & Automation Engineer

- Own AI and automation across the organisation — 49 n8n workflows designed and deployed, 8 running live in production.
- Built daily sales alerting joining counsellor rosters, walk-in logs and live MCube telephony to auto-escalate below-target agents.
- Built a RAG support-ticket agent over the brochure corpus, drafting replies strictly from retrieved source material.
- Automated the full LMS student lifecycle — daily onboarding provisioning plus scheduled archive and unarchive.
- Shipped real-time certificate generation, fee reminders and weekly feedback collection via n8n, Pabbly Connect and AiSensy.
- Built an AI ad-creative pipeline on OpenAI, extracting competitor ad structures and generating campaign variants for marketing.
- Built a Chrome extension and n8n webhook receiver deduplicating LinkedIn notification data into a 10,000-record store.

SkillCircle | Delhi NCR, India

Feb 2025 – Jan 2026

IT Executive

- Managed hosting for 1,200+ active domains across shared and VPS Linux environments (cPanel/WHM, DNS, SSL, BitNinja).
- Deployed the first AI chatbot workflows on skillcircle.in with SmatBot — the initiative that created the AI & Automation role.
- Automated student fee-payment reminders using Pabbly Connect, AiSensy and Google Sheets, removing manual follow-up.
- Built a WHMCS → Google Sheets order pipeline making billing data available for revenue reporting.

SNVA Ventures | Noida, India

Sep 2024 – Feb 2025

React JS Developer

- Built client-facing web applications and internal dashboards in React, turning designs into reusable, responsive components.
- Implemented data-driven dashboard views with client-side state management, API-backed data fetching and form validation.
- Worked with backend and design teams across concurrent client projects, improving front-end performance and browser support.

PROJECTS

n8n Automation Patterns — [GitHub](#)

Sep 2026

- Open-sourced six production automation patterns — RAG agent, idempotent provisioning, desired-state reconciliation, alerting.
- Tech stack: n8n, JavaScript, OpenAI, Google Workspace APIs, plus a pre-commit scanner blocking credential-shaped literals.

SkillCircle Job Portal — job.skillcircle.in

Sep 2026

- Three-sided marketplace for students, employers and coordinators — profiles, applicant pipelines, analytics; 260+ commits solo.
- Tech stack: Next.js 14, NestJS 10, Supabase (Postgres/Auth/Storage), BullMQ + Redis, Resend, TypeScript, on Vercel and Railway.

Admission Process Dashboard — [GitHub](#)

Sep 2026

- Replaced a single Google Form with a role-based admission platform — self-verification, admin approval gate and SLA timers.
- Tech stack: Next.js, TypeScript, Supabase, PostgreSQL and PL/pgSQL across 30+ SQL migrations, deployed on Vercel.

Sales Manager Portal — [GitHub](#)

Apr 2026

- Live multi-branch sales dashboard with counsellor drill-down across 13+ branches, with daily revenue snapshots to Postgres.
- Tech stack: React, Node.js, Express, Google Sheets API, Meritto CRM, PostgreSQL, JWT auth, on Render and Vercel.

GMB Review Manager — [GitHub](#)

Aug 2026

- Google Business Profile review monitoring and reply across every branch from one console, polled on a schedule.
- Tech stack: Node.js, Express, Google Business Profile API, three-legged OAuth 2.0 with refresh handling, PostgreSQL, node-cron.

Trainer Utilization Dashboard (*in progress*)

2026

- Batch-weighted utilization model, constraint-based trainer matching and dual-source reconciliation over the Edmingle LMS API.

Portfolio & Custom CMS — [GitHub](#)

Sep 2026

- Database-driven portfolio with its own admin CMS on Next.js 16, React 19, Tailwind v4 and Supabase with row-level security.

SKILLS

AI & Automation: n8n (49 workflows, 8 live), OpenAI / GPT, Claude Code, RAG pipelines, LLM workflow design, AI agents, Pabbly Connect

Full-Stack: TypeScript, JavaScript, Python, React, Next.js, Node.js, NestJS, Express, REST API design, Tailwind CSS, C/C++

Data & Backend: PostgreSQL, SQL schema design & migrations, Supabase, Firebase / Firestore, Redis / BullMQ, Google Sheets API

Integrations: Edmingle LMS, Meritto CRM, WHMCS, MCube telephony API, Google Business Profile API, OAuth 2.0, Resend, webhooks

Infrastructure & Tools: Linux, cPanel / WHM, DNS, SSL, BitNinja, Docker, Vercel, Railway, Render, Git & GitHub, Amoga

EDUCATION

B.Tech – Electrical Engineering

2020 – 2024

Rajkiya Engineering College, Sonbhadra

Uttar Pradesh, India

- CGPA: 7.5 / 10

ACHIEVEMENTS

- Ranked **10th at college level** in CodeKaze Round-2, organised by Coding Ninjas.
- Promoted from IT Executive within 12 months, on the strength of automation work adopted into core operations.
